

CUMULUS IMPLEMENTATION

Our Customer Success Team is dedicated to helping you seamlessly implement our technology across your entire site. During the implementation process, you will be assigned a dedicated Deployment Engineer to walk you through each phase of the project plan.

IMPLEMENTATION ROADMAP

1 Kickoff

A project plan is developed for your site implementation. Simply provide a system overview to our team, and we'll handle the rest.

Duration Estimate: 3 days

2 Configure

Our team sets up WorkFlows that meet your site requirements. We configure your settings, collect the right data, and setup our software and app.

Duration Estimate: 9 days

3 Launch

Receive onsite support from the Cumulus team to train users and ensure a seamless deployment experience. With online support available, get all the help you need to continue to optimize your connected work experience.

Duration Estimate: 7 days

IMPLEMENTATION TEAM

Our seasoned team of Deployment Engineers have domain experience in your industry, plus extensive software knowledge. They specialize in implementing both virtual and on-site training plans that make it simple to implement our technology based on your site workflows.

With pre-configured reports and no custom deployments required, our 100% cloud-based solution can be easily implemented in less than 30 days.
